Solicitation Creation and Management with Approval Workflow and Visual Analytics

NY City, April 15, 2019 – Sysoft® Corporation announced today a new release of the Solicitation Creation and Management (SCM) with Approval Workflow and Visual Analytics. The SCM System is integrated with visual analytics and context sensitive dashboards. The intuitive look and feel and visual analytics based interactive dashboards and reports provide productivity, ease of use and automated solicitation creation and monitoring capabilities. The approval workflow is flexible, parallel as well as sequential. SCM can version solicitation. It can collect Q&A automatically and publishes the same. It interfaces with Agency/Corporation websites, major solicitation announcement systems, Podcast, Webcast, social networking sites and more for augmented participation of the suppliers in the solicitation process.

Current and prospective users of the SCM include Cities, Counties, States, Federal Agencies, Schools, Universities, NGOs and Corporations. SCM integrates with major ERP Systems, Office Productivity Tools, and other Sysoft® products such as Spend Analytics, Contract Lifecycle Management (CLM) System, and SmartProcure Best Value Sourcing Systems.

About Sysoft Corporation

Sysoft Corporation started operations in 1991 providing software products, services, and training for data science, eBusiness, mobile applications, device implementations, procurement sourcing systems, contract monitoring tools, clinical data science, big data predictive analytics, intelligent systems for aerospace, investment banking, supply chain and more.
