Business Intelligence for Spend Analytics(BISA)

NY City, April 26, 2019 – Sysoft Corporation announced today the release of Business intelligence (BI) System for Spend Analytics. The system scrubs, enhances, imputes missing values in data from complex systems including Pcard and Accounts Payable Systems, Supplier Database, Contracts Database, ERP systems, and more to produce an automated BI output for Spend Analytics. The Spend Analytics system is capable of highlighting potential savings of Billions of dollars in supply chain, contract management, supplier performance and best value procurement. It is capable of producing continuous audit of non-compliant spends. Benchmarking capabilities of BISA over time and with similar organizations provide further insight into the efficiency of the Enterprise Level Spend system for the whole organization. The system utilizes Sysoft’s core technologies in AI, Machine Learning, Visual Analytics, Data Mining, Descriptive and Predicative Analytics, and Flexible and Filtered Reporting infrastructure.

Current and prospective users of the BISA include Cities, Counties, States, Federal Agencies, Schools, Universities, NGOs and Corporations. BISA integrates with major ERP Systems, Office Productivity Tools, and other Sysoft products such as Contract Management and SmartProcure infrastructure.
